

In the Claims:

1. (currently amended) A pivoting assembly ~~with a mount~~ for holding hunting equipment and ~~a clamp for attaching the assembly to a tube of an ATV extension kit~~, the assembly comprising:

a first threaded shaft with a ball seat, the first threaded shaft attached to and extending upward from ~~the~~ an extension kit clamp;

a second threaded shaft with a ball seat, the second threaded shaft attached to and extending downward from ~~the~~ a hunting equipment mount; and

a shaft having a pivot ball and attachment nut on each end, the attachment nuts adapted to release or secure the ball in the ball seat of each of the threaded shafts, thereby providing a locking means on each end of the shaft for holding the shaft in a selected orientation.

2. (original) The assembly of claim 1 wherein the shaft is a round tube and each ball has an attachment shaft adapted for a press fit into the shaft round tube.

3. (currently amended) The assembly of claim 1 wherein the hunting equipment mount is a gun mount.

4. (currently amended) The assembly of claim 1 wherein the hunting equipment mount is a bow mount.

5. (currently amended) A pivoting assembly for positioning a hunting equipment mount on an ATV ~~where the pivoting assembly is attached to a vehicle with a clamp~~, the pivoting assembly comprising:

a first ball on one end of a shaft, the first ball having a first attachment nut;
a second ball on the other end of the shaft, the second ball having a second attachment nut;

a first threaded shaft with a seat for receiving the first ball, the first threaded shaft being attached to ~~the~~ a rack extension clamp; and

a second thread shaft with a seat for receiving the second ball, the second threaded shaft being attached to ~~the~~ a hunting equipment mount.

Al 6. (currently amended) The pivoting assembly of claim 5 wherein the hunting equipment mount is a gun mount.

7. (currently amended) The pivoting assembly of claim 5 wherein the hunting equipment mount is a bow mount.

8. (currently amended) A pivoting assembly for holding hunting equipment in a user selected position, the assembly comprising:

a mounting shaft with a ~~lockable swivel~~ coupling nut and ball on each end;
a U-shaped mount ~~coupled to a first swivel of the lockable swivels~~ with a threaded shaft adapted for coupling to one end of the mounting shaft; and

a clamp adapted for attachment to a rack extension kit, the clamp having a threaded shaft for coupling to the other end of the mounting shaft ~~coupled to a second lockable swivel of the lockable swivels~~.

9. (currently amended) The pivoting assembly of claim 8 wherein the equipment U-shaped mount is adapted for holding a gun mount.

10. (currently amended) The pivoting assembly of claim 8 wherein the equipment U-shaped mount is adapted for holding a bow mount.

11. (currently amended) A pivoting assembly ~~with a mount for holding hunting equipment and a clamp for attaching the assembly to a tube of an ATV extension kit, the assembly~~ comprising:

a first means for pivoting where the first pivoting means is lockable and where the first pivoting means is attached to ~~the~~ a U-shaped equipment mount adapted for holding hunting equipment;

a second means for pivoting where the second pivoting means is lockable and where the second pivoting means is attached to ~~the~~ a clamp adapted for coupling to an ATV extension kit ; and

a mounting shaft connecting the two pivoting means.
